# GET THE WORLD'S MEDICAL EXPERTS ON YOUR CASE

As an ihi Bupa customer you have free access to the Expert Medical Opinion Service provided by Advance Medical.

This service provides you with a review of your medical case by top medical professionals all over the world and gives you independent and authoritative information you need to make difficult health related decisions – without you having to travel anywhere.

## How does it work?

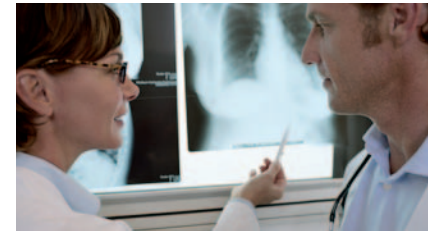

For an expert opinion on your diagnosis, call the ihi Bupa Medical Centre and we will connect you with Advance Medical. Advance Medical will then allocate one of their multilingual doctors as case manager to you. The case manager will talk to you, gather all the relevant records and contact the world's leading experts on your condition. The experts will review your case, confirm or revise your diagnosis and recommend next steps for treatment. You'll get a full printed report, which you can discuss with your own doctor and your Advance Medical case manager.

This is a free service to all customers with an ihi Bupa health insurance plan.

To get medical experts on your case, simply call our Medical Centre on:

**+45 33 15 33 00**

ihl Bupa and your insurer (if another insurer is indicated on your ihi Bupa policy documents) are not liable for any information or advice Advance Medical provides to you. Advance Medical will require you to sign a consent form. This service does not act as a pre-approval of cover – after you receive your medical opinion, you must contact ihi Bupa to confirm your recommendation is eligible for cover.

Whatever your concerns, a second medical opinion can help give you the answers and reassurance you need.

- Is my diagnosis correct?
- Am I on the right treatment plan?
- What are the latest drugs and treatments?
- Who are the leading experts in this field?

Advance Medical is ihi Bupa's independent provider of expert medical opinions.
